

Team Roles:

Product Owner: Rishabh Prasad

Scrum Master: James Nolan

Developers:

Ethan Langford

Hunter Pearson

Nitin Pendekanti

Jack Sanchez

Preston Bied

Sprint Goal:

The main goal for the fourth sprint is to create a better filtering system and redesign the layout of the app. Other goals for the sprint include doing post request features and implementing the chat.

Which stories are in the Sprint Backlog and how many points:

The stories that are in the Sprint Backlog are:

Add specific filters for clothing types (2 points)

Rating and Review of Donors (2 points)

Set up location (1 point)

Design and implement styles (3 points)

Item donation completion (1 point)

Map for Requestor Locations (1 point)

Redesign landing page to have user select clothing type (2 points)

Listing chatroom feature (2 points)

Which developer each story is assigned and what are the tasks required to complete that story and the estimated time required for that task:

Add specific filters for clothing types - Rishabh Prasad

- Create new table linking clothing types to specific filters [1 hr]
- Design new type-specific page with filters for a given type [2 hr]
- Set up routes for new type-specific pages [0.5 hr]

Rating and Review of Donors - Hunter Pearson

- Create the table for reviews [0.5 hr]
- Assign review to donor after item request completed [1 hr]
- Display rating for donor [0.5 hr]

Set up location - Nitin Pendekanti

- Create API to connect to Google Maps [.5 hr]
- Create UI to put pin at location [1 hr]
- Display for student [.5 hr]
- Show this for each pickup [0.5 hr]

Design and implement styles - Ethan Langford

- Design a mock up style for the website [0.5 hr]
- Implement mock up into web app [2 hr]

Item donation completion - James Nolan

- Add UI button for pickup confirmation in dashboard [0.5 hr]
- Ensure Complete system from upload to drop-off [1hr]
- Complete all table updates (mark as completed) [0.5 hr]

Map for requestor locations - Nitin Pendekanti

- Create API to connect to Google Maps [.5 hr]
- Create UI to put pin at location [1 hr]
- Display for student [.5 hr]

Redesign landing page to have user select clothing type - Rishabh Prasad

- Isolate base filters of clothing type into separate entity [1 hr]
- Modify landing page to show only base filters [1.5 hr]
- Configure on-click actions to lead to type-specific page [1 hr]

Listing chatroom feature - Jack Sanchez

- Modify database to contain chatroom objects [1 hr]
- Ensure that chatrooms are contained to listing owner and students [0.5 hr]
- Modify chatroom styling [0.5 hr]
- Link listings to chat feature [0.5 hr]
